

Personal Report

Name:	NAGISSWARARAO NANDIGAM
Project:	COURSE MATCHING SYSTEM

Write down what you learned:

1.	Understood how different pieces of code put together
2.	Got to know how to use backtracking approach
3.	Applied some of the basic data structures into my project
4.	Improved on logical thinking on problem
5.	Understood how to model the system before programming
6.	Some times we can't get perfect solution like this for
7.	Project like this, learned how to get best solution possible

Feedback about the project (comments, suggestions for improvement, etc.)

1.	Both are good projects for applying data structure concepts
2.	I would like to see more projects list into choose
3.	
4.	
5.	
6.	
7.
